

The CTRONIQ™ SNOOK C10 Tablet makes use of the most innovative technology available to deliver an experience such as you have never seen before. It has a wide 10.1" display which takes full advantage of the latest technology to provide you the realistic, rich and sharp picture viewing. The processor integrated is a Cortex A7, 1.3GHz which makes this tablet more capable and work efficiently.

SNOOK C10 tablet possesses a dual camera facility; a 2.0MP rear camera and a 0.3MP front camera. The rear camera gives good resolution images and lets record videos. The front camera is certainly useful in taking those self-content selfies and video calls with your loved one.

You can carry the SNOOK C10 tablet anywhere you go; your portable partner every step of the way. It is embedded with 1GB RAM and 16GB flash memory (up to 32GB) where you can store all your documents which can be accessed easily when required.

Multitasking feels like a piece of cake when it comes to CTRONIQ™ SNOOK C10 Tablet. It lets you split your screen and do two things at a time or also enjoy two apps on the same screen. Now you do twice the work within the same time span.
