

Ctroniq
Force F1

Feature Phone

Simple, yet elegant!

The Ctroniq™ Force F1, justifies this statement like no other. This phone features 1.77" TFT display with the image resolution of 160*128 pixels. It's a light weight device with the dimensions 111.7mm*47mm*14.5mm which makes it compact and easily portable. This handy phone also comes with a rear camera of 0.08MP and a RAM of 32MB for storage of files and records. Force F1 is powered by 600mAh battery which is long-lasting. You can also stay connected to your social network.

Force F1, comes with an inbuilt flashlight which can come in handy during emergencies. This is a simple GSM phone which supports the spectrum GSM 900/1800MHz. It includes a platform (SC6531DA) which helps in smooth and efficient functioning of the phone. Another most sought out feature of this phone is the 2030 speaker which gives a nifty sound effect for all the music files. Force F1 also includes a Bluetooth that lets you establish connection with any other Bluetooth compatible and share pictures, music, etc.
