 Save 3 trees!

Ultra Light
 Easy to manage design

2 Year Battery Life

The Vimba WS1 is an affordable inkless & paperless technology which is both environmentally friendly and reliable. Foster creativity and kindle the joy of expression.

"Reflex LCD," a pressure-sensitive, flexible plastic that requires zero power to preserve the written content and the battery is only utilized to erase the screen. Written and graphic images are created with an included stylus or any other instrument that will apply the desired pressure; highly responsive to variable amounts of pressure.

Non radiative (no electromagnetic radiation) technology makes using the LCD easy on the eyes.

With 60,000+ Erase Cycles using the Erase button of the writing tablet makes it equivalent of using 60,000+ sheets of paper. No mess or wasted paper!

Ultra-thin and ultra-light product design ideal for the home, office, school, or on-the-go.

Screen lock keeps work from getting deleted by mistake.
